EXPERIENCE

- ❖ **Mobile App Developer Intern | Texoul** (Feb '24 - Jul '24)
Wrote frontend & backend APIs for building an e-commerce mobile application, maintained the codebase using GitHub - Dart, Flutter, Laravel, MySQL.
- ❖ **Flutter Mobile App Developer | DotSinc** (Jul '24 - Dec '25)
Developed Flutter mobile & web applications, including social media, food delivery, chat, ride booking, and appointment booking systems. Implemented Firebase services, REST APIs, payment gateway, push notifications & cloud functions.

EDUCATION

- ❖ Bachelor of Artificial Intelligence | Kfueit, RYK CGPA: 3.3 | (Jan '22, Feb '26)
- ❖ FSc (Pre-Engineering) | Khawaja Fareed Government College, RYK 51.0% | 2022

SKILLS

- ❖ Dart, Flutter, Firebase
- ❖ GitHub
- ❖ Docker
- ❖ Python, Django

PROJECTS

- ❖ **Noptime | Mobile App**
Description: Cross-platform iOS and Android community app that helps users utilize free time through personalized activity recommendations and social interaction features.
Link: <https://noptime.com>
Link: <https://play.google.com/store/apps/details?id=com.noptime>
Role: Front-End Developer
Technologies Used: Flutter, Dart, REST APIs, Push Notifications, Getx
Outcome: Successfully implemented deep linking, intent sharing, real-time notifications, and state-based navigation across the entire app, improved understanding of scalable app architecture and advanced notification handling.
- ❖ **Brainiac's | Mobile App | Web App**
Description: Full-scale childcare management platform with mobile and web applications, built to enhance parent-school communication and streamline multi-branch academic and administrative operations.
Link: <https://brainiacchildcareportal.web.app/>
Link: <https://play.google.com/store/apps/details?id=com.brainiacsmobile.app>
Role: Front-End & Backend Developer
Technologies Used: Flutter, Dart, Flutter-web, Firebase, Cloud Functions (JavaScript), API(Send Grid), Push Notifications, Provider (State Management).

Outcome: Developed a responsive web platform with proper route handling, implemented backend logic using Firebase Cloud Functions, integrated real-time notifications and email services, and gained strong expertise in Flutter Web architecture and Provider state management.
